Carol's *"Fanfare for The New Renaissance"* for brass ensemble has had the honor of a second performance in Italy. This time the work was performed at the famed *Santa Fiora Music Festival* during *Italian Brass Week*. Conducted by world-renowned musician **Luca Benucci**, the piece was performed by some of the most respected brass musicians from around the world, International Soloists and members of the New York Philharmonic, Vienna Philharmonic, Baltimore Symphony, Israel Philharmonic and ex-Canadian Brass.

The musicians themselves, some of the best in the world, applauded the composition. The future looks bright for this special work! A video of the performance is on the way which we promise to share with you on Carol's site as soon as it arrives.

Here's wishing all of you a wonderful holiday season, and a prosperous and creative new year!
